TellTable

an audited spreadsheet
approach for data
entry and edit.

John Nash

School of Management

nashjc@uOttawa.ca

What

- Software tool for using familiar spreadsheet for data entry and edit
- BUT ... with a full audit trail of ALL changes
- PLUS an analysis program to filter the large volume of entries

Why

- Spreadsheets are familiar
- Folk use them in “blackbook” mode anyway
- Make it easy to do the “right” thing
- Safe, multi-site collaboration built-in

When

- Available now!

Where

- www.telldtable.com
- telldtable-s.sf.net
- Installs on your Linux PC server

Who

- John Nash
- Neil Smith
- Andy Adler
- Sylvie Noël

How

- Install OpenOffice.org on a server

AND...

- Also useful for other office files
 - Word processing documents
 - Presentations
 - Drawings
